MINNESOTA ODONATA SURVEY PROJECT

Reporting Form

There is a minimum amount of information that should be submitted with each specimen. Without properly labeling, a specimen is worthless. The information that you provide should allow someone else to return to the exact location where the specimen was found, as well as giving the exact date and who is reporting the find. All data submitted should be from Minnesota.

COUNTY		**DATE**			
NAME					
ADDRESS					
CITY		**STATE**		**ZIP**	
PHONE		**EMAIL**			

LOCATION describe or lat/long

Descriptions should include the name of the lake or stream, distance from roads, boat landing, bridges or other landmarks. The description should allow another person to easily get to back to that location. Township/range/section descriptions or latitude/longitude readings from a GPS or read from a detailed map are particularly useful ways to describe a location.

FIELD NOTES

General comments on weather, ecology, time of day, vegetation, etc.

OBSERVATIONS

Netted?	Species Observed & Gender	Adl, Tnl Lva or Exu	Photo File Name (if submitted)	Abundance at Site 1-5 (low-high)
